

Brayco 885

Low Volatility, Aircraft Instrument Lubricating Oil

Description

Castrol Brayco™ 885 is a diester base synthetic oil with additives which impart corrosion protection, minimize galvanic corrosion, inhibit oxidation, and reduce foaming tendencies. It has exceptionally low volatility and good viscosity temperature characteristics. Temperature Range Brayco 885 is designed to operate over the temperature range of -65°F to 250°F (-54°C to 121°C).

Application

Brayco 885 is intended for use in aircraft instruments, electronic equipment, or in applications where an oil with a low evaporation rate is required for both high and low temperature operation, and also where oxidation and corrosion resistance are desirable. Brayco 885 may adversely affect certain paints and elastomers. Products other than those developed for diester base fluids should be carefully tested for compatibility prior to use.

Typical Characteristics

Name	Method	Units	

Subject to usual manufacturing tolerances.

Additional Information

Brayco 885 is qualified under Specification MIL-PRF-6085D. It is specified as a P-17 preservative under packaging Specification MIL-STD-2073-1.
